PERSONAL STATEMENT

I'm a 32 year old Design Practitioner and currently based in Bangalore, India. I love tapping the potential of good design especially to build sound businesses and to transform stakeholders interest.

I have 10+ years of experience working as a multi - disciplinary designer, both in a studio and organisation format. I prefer working with people and teams, especially if they have the same passion I have for what they do.

In regards to my professional growth, my interest largely remains in problem-solving via "design thinking" and building greater solutions in digital space with meticulous attention to human-centric values.
